

The Funni Farm Product Handling & Storage Standards

Effective Date: January 1, 2026

Purpose

These standards describe how The Funni Farm strives to handle and store products before they are shipped to customers.

Storage Conditions

Products are stored in clean, dry areas and protected from excessive heat, moisture, sunlight, and contamination whenever reasonably practicable.

Inventory Rotation

Inventory is rotated to promote shipment of older eligible inventory before newer inventory where practical.

Packaging Protection

Products are packaged to help reduce damage during normal shipping and handling.

Damaged Inventory

Products showing signs of damage, contamination, or compromised packaging are removed from sale whenever identified.

Continuous Review

Our storage and handling procedures are periodically reviewed and updated as our operations grow and improve.
